

## GRAVITY POINT SPEY LINE MANUAL

Thank you for choosing our fine CND Spey line. CND Spey lines are designed by the CND spey casting team, and produced by RIO Products Intl. Inc., using their most advanced processes and technology. This partnership produces state-of-the-art taper designed spey lines with high performance casting ability.

### Five Unique Features of Gravity Point Spey Lines by CND

1. **Gravity Point technology makes distance casting easy.** Long distance casts are a result of computer aided taper calculations that place the most weight effectively in the D-Loop. This Gravity Point is what drives the loop and enables effortless long casts.
2. **The tip is specially designed to create positive turn over.** The tip taper incorporates a level section that promotes exceptional turnover with the GPS belly design.
3. **Two different line densities - one for distance and one for up-close.** The larger lines sizes (10/11 and 11/12) are made with higher density material to reduce the line profile and allow a more efficient penetration of the air - resulting in longer casts. The smaller lines (5/6 - 9/10) are made with less dense, higher floating material to enhance the surface fishing most common with these lines.
4. **Belly length matches the rod length to maximize the effect of the Gravity Point.** The belly length is extended by 5' on each line weight so as to match the rod lengths.
5. **All lines feature factory loops to attach interchangeable tips.** All GPS lines come with a 20' floating tip. Also available are a 20' intermediate tip that is tapered and density compensated, and a standard 15', with a Type 3, 4, and 6 tips for multi depth control.

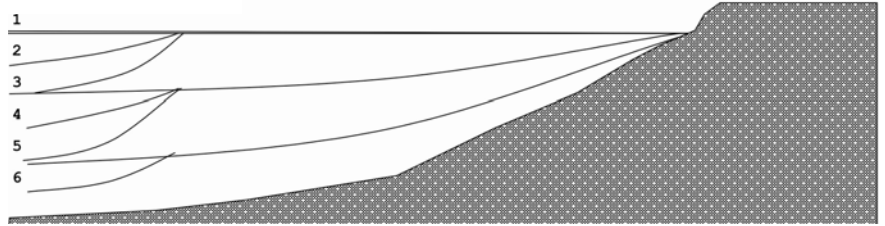

Item Code	Line Specifications	Approx. Head wt. in gram & grain	MSRP
<b>CND Floating Spey line</b>			
GPS4/5F	50' Head TTL 110' (33.5m) 20lb core No looped Tip	23.0gm (355 grain)	\$110
GPS5/6F	55' Head TTL 115' (35.1m) 20lb core 20' Looped Tip	28.0gm (432 grain)	\$110
GPS6/7F	60' Head TTL 120' (36.6m) 20lb core 20' Looped Tip	33.5gm (512 grain)	\$110
GPS7/8F	65' Head TTL 125' (38.1m) 25lb core 20' Looped Tip	38.5gm (594grain)	\$110
GPS8/9F	70' Head TTL 130' (39.6m) 25lb core 20' Looped Tip	43.5gm (671 grain)	\$110
GPS9/10F	75' Head TTL 135' (41.1m) 30lb core 20' Looped Tip	50.5gm (779 grain)	\$110
GPS10/11F	80' Head TTL 140' (42.7m) 30lb core 20' Looped Tip	58.5gm (903 grain)	\$115
GPS11/12F	85' Head TTL 145' (44.2m) 30lb core 20' Looped Tip	68.5gm (1057 grain)	\$115
<b>CND Intermediate Belly</b>			
GPS9/10 I	65' Head TTL 125' (38.1m) 30lb core 20' Looped Tip	51.0gm (787 grain)	\$110
GPS10/11 I	65' Head TTL 125' (38.1m) 30lb core 20' Looped Tip	59.0gm (910 grain)	\$110
<b>CND Type 3 Full Belly</b>			
GPS9/10S3	60' Head TTL 120' (36.6m) 30lb core 15' Looped Tip	51.0gm (787 grain)	\$110
GPS10/11S3	60' Head TTL 120' (36.6m) 30lb core 15' Looped Tip	59.0gm (910 grain)	\$110
<b>CND Interchangeable Tips</b>		<b>Tip weight in gram &amp; grain</b>	
GPS5/6T20F	20' Floating tip for GPS5/6F & 6/7F	7.0 gm (108 grain)	\$15.50
GPS7/8T20F	20' Floating tip for GPS7/8F & 8/9F	7.3 gm (113 grain)	\$15.50
GPS9/10T20F	20' Floating tip for GPS9/10F ~11/12F	7.8 gm (120 grain)	\$15.50
<b>Intermediate Tips</b>			
GPS5/8T18 I	18' Intermediate tip for GPS5/6F ~8/9F	7.0 gm (108 grain)	\$20.00
GPS9/10T20 I	20' Intermediate tip for GPS9/10~11/12F&I	7.8 gm (120 grain)	\$20.00
<b>Type 3 &amp; Type 6 Tips</b>			
GPS5/8T15S3	15' Type-3 Tip for GPS5/6F ~8/9F	6.2 gm (96 grain)	\$20.00
GPS9/10T15S3	15' Type-3 Tip for GPS9/10F ~11/12F& I	7.0gm (108 grain)	\$20.00
GPS9/10T15S6	15' Type-6 Tip for GPS9/10F ~11/12F& I	7.0 gm (108 grain)	\$20.00
<b>CND Skagit Lines *New</b>			
GPS-7/8SK	28' Skagit Belly without tip	530 grains	\$44.95
GPS-8/9SK	30' Skagit Belly without tip	600 grains	\$44.95
GPS-9/10SK	32' Skagit Belly without tip	650 grains	\$44.95
<b>CND Skagit Line Adjuster Kit *New</b>			
2', 3' and 4' Loop to Loop Adjusters		28, 44 and 60 grains	\$33.95
<b>CND Shooting Head Lines *New</b>			
GPS-10/11ST i	48' Head with tip	690 grains	\$54.95
GPS-10/11ST 2	45' Head with tip	690 grains	\$54.95
<b>CND Double Taper Spey line *New</b>			
GPS-7/8/9DTF	Double Taper Full Floating Line TTL 110' with tip	1055 grains	\$110.00
GPS-9/10/11DTF	Double Taper Full Floating Line TTL 120' with tip	1245 grains	\$110.00

\*All lines include plastic spool in box and line manual. Spare tips available for sale in clear bag with header.

## Arranging Depth Control When Fishing with CND Lines & Tips:

Multi-depth control system:

1. Floating line on surface
2. Floating line & intermediate tip
3. Floating line & type 3 or intermediate belly
4. Intermediate & type 3 tip
5. Intermediate & type 6 tip or type 3 belly line
6. Type 3 belly line & type 6 tip

## **IMPORTANT: Proper Line Care and Use!**

In order to keep CND Spey line in good condition please be sure to observe the following:

1. Always put enough backing line on small arbor fly reels to avoid coil memory of running line.
2. When using new line, please pull all line out from the reel (without the leader) on the water to release the twist.
3. When you notice twist in the fly line while fishing, pull all line out on water to release the twist again.
4. Always use proper knots (refer to the knot tying books) to connect fly line with leader and fly line with backing line.
5. Make sure all connection knots are correctly knotted before initial line use.

## **Preserving your CND Spey line Investment:**

The following will damage your fly line and decrease its longevity:

1. Do not step on the line;
2. Do not cast without a leader;
3. Do not cast line into rocks or trees;
4. Do not make a D loop on top of sandy or rocky river banks;
5. Make sure you do not have any sharp edges on your reel;
6. Do not pull too hard when your line is snagged on the bottom or a bank;
7. Do not use any solvents, such as gasoline, for cleaning your line and keep it away from bug repellents and sun screens;
8. Keep lines away from fire or any excessive heat, including direct sunlight inside a car.

## **Cleaning your CND Spey line:**

CND Spey lines are self lubricating, however cleaning is an important aspect of fly lines' longevity and we recommend cleaning after every use. Sand, dirt, debris or salt (saltwater use) remaining on the line will damage it, reduce its natural buoyancy, and may cause damage to the line guides as well. When you notice your line is not shooting well, or the tip of a floating line is beginning to sink, it's overdue for a good cleaning.

Use a few drops of mild soap with water and clean the line well. Once it's cleaned and dried, apply 100% silicon line cleaner on a cloth and pull the line through the cloth. The coating should be a thin film to prevent dirt buildup. The silicon grease will help float the line and aid in shooting.

## **Limited Warrantee:**

CND warrants this product against any defects in material and/or workmanship for one year. In the event the product is found to be defective, CND will, at our option, replace or refund the purchase price of the product within a reasonable time after inspection.

To obtain warranty service, please contact either CND Japan or CND Spey USA at the addresses listed below. Returned products must include your name, address, date of purchase, dealer purchased from, description of the product (line type) and any defects.
